DESCRIPTORS: \*Paleoclimatology, \*Geology, \*Geological  
time, Errors, Stability, Magnetic fields, Earth,  
Terrain, \*Terrestrial magnetism, Rock.

First approximation paleomagnetic measurements  
agree with the results of the alpeoclimate reconstruc-  
tion. It is impossible to prove a relative movement of  
continents (mainlands) on the basis of paleomagnetic  
data for the following reasons; the accuracy of paleo-  
magnetic measurements is very low and allows to de-  
termine only transferences as great as 2000 km and  
(Earth Sciences--Geology, TT, v. 7, no. 9) (over)
